WOOD-Y

ABOUT US

Wood-y , was established in 2014 by the 4th generation representatives of a heritage that is rooted in early 1900s with sait yazıcı - the great Grandfather of the family who was a logger and carpenter - upon Transferring his wood love and craftsmanship to the next generation.

Combining its 4 generations of deep-rooted woodworking experience With modern architectural techniques , metarial quality , flawless Craftsmanship and innovative solutions , wood-y is the "The First and Pioneer of the Sector" wood construction company in its field that offers custom or project-Based turnkey services.

Embracing the philosophy of producing nature-friendly, healthy, Aesthetic and sustainable living spaces by using %100 natural wood Materials, wood-y continues to undertake distinctive projects both in Nationwide or abroad with its expert staff, state-of-the-art machinery, Material quality and customer-oriented service approach.

OUR EXPERTISE

Ready-to-move-in wooden house models, offering 4 seasons living and easy installation with its Scandinavian chalet inspired architecture to cater for all tastes.

Turnkey contracting services for commercial use such as social facilities, cafes, restaurants, hotels, etc.

Production of modular wooden building materials offering innovative solutions for wooden structures with distressed surface to reveal the organic beauty of the wood as well as extra insulation and wide range of color options.

After-sales services such as interior design , maintenance and installation.

Sait Yazıcı in 1920's

DISTINCTIVE FEATURES

Modular System

In addition to our standard models, we can produce many different wooden house models that meet every need owing to our advanced interlocking system wooden panels as a result of long R&D studies.

Custom Formulated Paint

Our custom formulated, impregnated and handapplied paint provides extra protection with its anti-bacterial and heavy metal-free features.

Advantageous Endurance

We build healthy living spaces to be used for hundreds of years with the preventative maintenance through using kiln-dried wood products which provide an ideal level of dryness to prevent wood-damaging worms, pests and fungi.

Easy Installations

Thanks to the modular system we have developed, each model can be installed in a week with 2 people or in 1 day with the team.

Efficient Insulation

Our house models offer effective sound and heat insulation for 4 seasons use without requiring any additional treatment through its laminated wood panel design with insulation board inside, stone wool application on the floor as well as Isicam brand insulated glaa units and roof cladding system.

Earthquake Resistance

Wooden carcass system and wooden walls consisting interlocking panels act as loadbearing elements as well as providing 5 times extra resistance earthquakes comparing to the concrete structures.

Textured Wood

We clean the upper layer of the wood that will rot in the first 20 years by revealing its organic texture with natural techniques. Thus, we provide an aesthetic appearance to exterior and interior spaces with this process while extending the life of the wood against external factors.

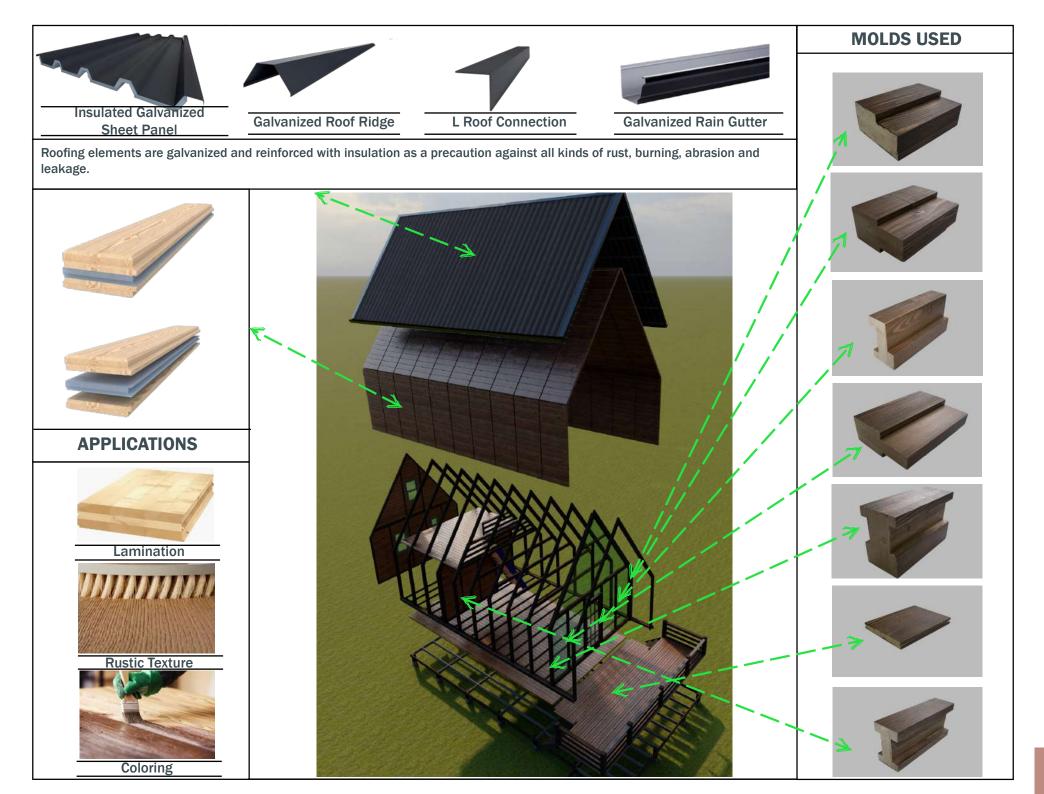

Innovative Foundation System

We make solid foundation applications that can be easily applied to all types of terrain without the need for concrete and additional reinforcement as a result of the pile foundation system we have developed.

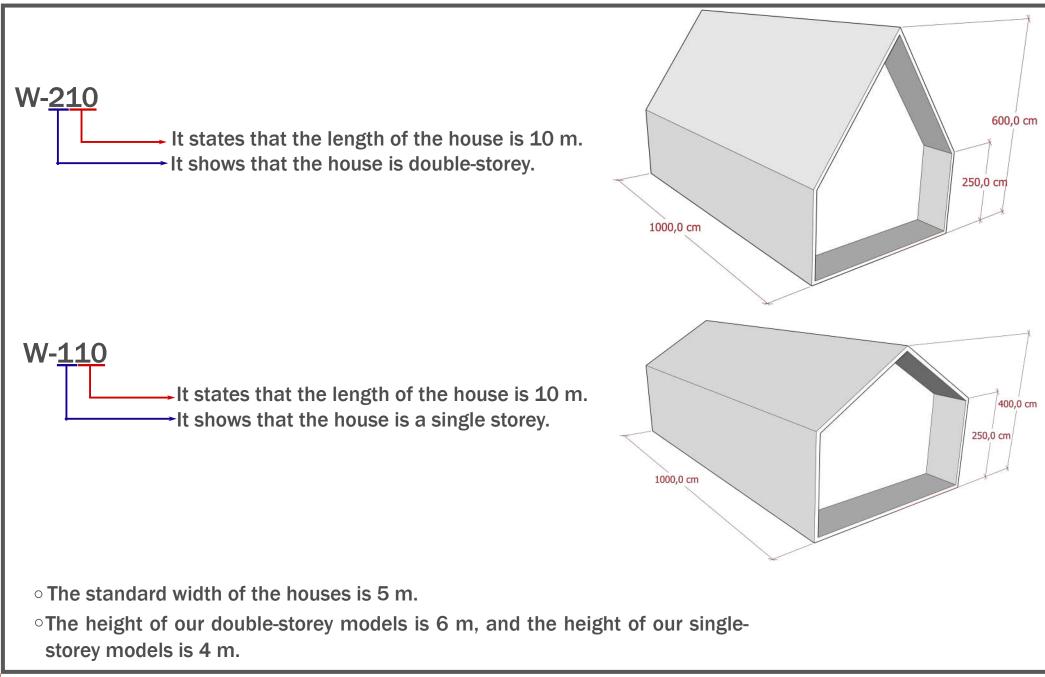

Fire Resistance

Our house models offer maximum fire resistance with its flame retardant features such as our special formula impregnated paint and fireproof insulation board in wooden wall panels.
